Software

by **Instromet Ltd**

Instromet Ltd have produced software for their range of Met-Log data loggers since 1995 and as Microsoft Operating systems have changed so our software has evolved from the initial DOS version through Windows 3.1, 95/98 up to the present XP.

Met4Net software is supplied with our MeT4Net data logger and Automatic Weather station and incorporates the features listed below

Met4Net was primarily designed to enable networking and uploads to Web sites but now has many other attributes. It functions perfectly on all platforms from Windows 98 up to XP.

The following summarises the attributes of the programme:-

<i>Feature</i>	<i>Met4Net</i>
REAL-TIME (active) display	√
REAL TIME SCREEN user configurable	√
DISPLAY MAP with Wind Direction rose superimposed	√
RUN IN BACKGROUND - maximise when required	√
Store 100K RECORDS independent of PC	√
